A	<b>HD20LT+G</b> 1.5" Vacuum point - C/W plug - grey metallic	<b>£39.00</b>

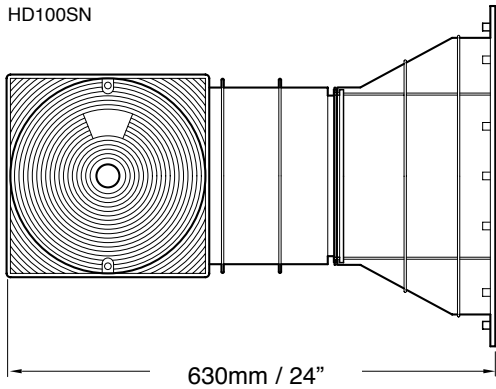

Certikin recognise that today's customers have a far broader palette of pool finishes available to them and that aesthetics are vitally important, that's why we are pleased to introduce the Optimus range of flow fittings to blend in with darker pool finishes in both concrete and liner versions.

With the popularity of Salt Chlorinators on the increase the Optimus range offers the ideal solution for corrosion free flow fittings.

# Certikin Main Drains

## HD33 - Main Drain

Current recommendations state that every pool should have at least two Main Drains. Therefore, at least one Main Drain on every pool will need the bottom port sealed off - that's why the new Certikin Main Drain body has a knock-out blanking plate in the bottom port to save you time and money on site.

### Main Drains

On commercial or shallow pool applications stainless steel main drain grilles must be used. Recommendation - Main Drains must be arranged so that there is no risk of bathers being drawn towards them or trapped there. It is recommended that on all installations a minimum of 2 x main drains are installed 2 metres apart.

#### Main Drain - Concrete Pools

		Price
<b>A HD33</b>	6" Main drain with anti vortex grille	<b>£31.25</b>
<b>A ZZ0301</b>	Main drain C/W plug, bush & nipple	<b>£37.70</b>

# Commercial Main Drains

Main drains must be arranged so that there is no risk of bathers being drawn towards them or trapped there. It is recommended that a minimum of 2 x Main Drains are installed 2 metres apart. All flow rates listed do not exceed 0.5m/sec velocity.

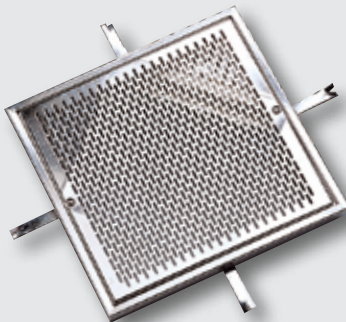

**Handy Tip:** We can make replacement main drain grilles from HDPE to match any shape or size of drain. Turn to page 108-109 to find out more or contact the Commercial department on 01993 778855.

# FloLux Stainless Steel Pool & Spa Fittings

The design-protected FloLux range represents the full suite of visible wall fittings for pools, spas and water features and will offer discerning owners a superior, safe and affordable finish.

Innovatively designed in Australia, FloLux fittings are suitable for concrete pools, spas and other submerged applications; sit flush to pool and spa walls and floors; are designed for easy installation and can be easily installed directly into 1.5" pipe.

FloLux fascias are designed and sculpted from 316 stainless; are polished for a superior, first-class finish; and are safely secured to the high-grade PVC backing through the FloLock System.

The FloLux finish ensures every aspect of a luxury pool or spa is visually and functionally of the highest calibre. With a focus on innovative design, aesthetic excellence and quality craftsmanship, the uncompromising FloLux range is a revolution in safety, elegance and incomparable finishing for concrete pools and spas.

Please note: FloLux fittings should not be used in any body of water where an electrical charge is produced by a sanitation system or otherwise.

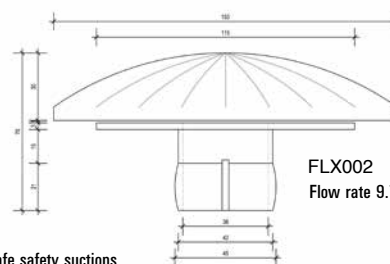

Sanitation systems that create an electrical charge include but are not limited to the following: Saltwater chlorination systems, silver and copper ionization systems, and mineral systems.
